

CASE STUDY | NONPROFIT

Christian Community Assistance

Challenges

Christian Community Assistance, a non-profit, faith-based organization, would prefer not to focus on trash and its waste partner, but knows that pick-ups must happen, and must happen on a schedule. Always looking to keep costs in check, Christian Community Assistance was experiencing some higher increases on its bill and a lack of billing transparency, and needed to switch to a new waste and recycling provider.

Value Created

- Rubicon stepped up and connected Christian Community Assistance with a local hauling partner, and was able to give the company a reduced cost structure.
- Christian Community Assistance was also able to get more transparent pricing from Rubicon and its hauling partners, which gave Christian Community Assistance peace of mind.
- With the cost savings, Christian Community Assistance is able to reinvest back into its community outreach programs.

Rubicon opened our eyes to the fact that we were being over-billed and over-serviced by our previous waste vendor. As a non-profit, we are on a very tight budget, so every dollar Rubicon has been able to save us really does make a difference for our organization and the community. We are very happy we made the switch to Rubicon for our waste solution.
